

Diatom-X[®]

Kiselgur / Piimaa

220 g

Poison free, odor free and for ecological use

Naturally desiccant mineral

EN Content: 100% KISELGUR (diatomaceous earth) Kiselgur is a natural soil type that consists of sedimented diatoms. This product contains uncalcined diatomaceous earth, with the highest purity grade, with an average particle size of approx. 9 micrometers.

Use: For organic animal husbandry and treatment of animal stables. Counteracts moist as a natural desiccant. It also binds ammonia which removes unwanted odor. A dry environment counteracts fungal and mold growth as well as insects (ex. lice, mites, ants etc.) Application: sprinkle a thin and narrow layer (approx. 15 gr / m²) around or on the surfaces to be treated. It is also possible to mix the product with water and then spray (dosage: 1 tablespoon (15 ml) per 1.25 liters of water)

Safety: IN CASE OF CONTACT WITH EYES: rinse cautiously with water for several minutes. Remove contact lenses if possible. Continue to rinse. Avoid inhalation.

Packaging: Net content 220 grams. The contents shrink during transport.
Disposal: the contents are treated as residual waste, the container is sorted as hard plastic.
